-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 05 February 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05 February 2007 has been entered.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Election/Restrictions***

3. Claims 3-5 and 8-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species (claims 3-5) and invention (claims 8-21), there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 03 April 2006.

Claims 3 and 4 are now withdrawn because the claims require the substrate to have a shrinking property (otherwise the substrate could not be shrunk) and the applicant had previously elected the species drawn to an extendable substrate. That claim 3 uses the transitional phrase "comprising" does not mean that the claim reads on the elected species because the substrate of this claim is now not directed to a generic material but rather to an unelected species.

***Claim Rejections - 35 USC § 112***

4. Claims 1, 6, and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection. No support could be found in the disclosure as originally filed for a substrate that is both (a) made of an irreversible elongate material, and (b) has a photo-shrinking property. The specification describes forming a display device on a substrate having a size smaller than a desired size (i.e. a substrate that is elongated during production) *or* a substrate having a size smaller than a desired size (i.e. a substrate that shrinks during production) (see paragraph 0067 on page 9). In each of the embodiments described (e.g. first exemplary embodiment starting at paragraph 0068 on page 9, second exemplary embodiment starting at paragraph 0142 on page 9, third exemplary embodiment starting at paragraph 0176 on page 33, fourth exemplary embodiment starting at paragraph 0181 on page 34), the material used is either an irreversible elongate material or a shrinking material. Moreover, none of the materials cited as having an irreversible elongate property (paragraph 0072 on page 11) are described or universally known to possess a photo-shrinking property.

***Response to Arguments***

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
